# We're excited to have you on board.

Our easy guide will help you get up and running in no time.

We'll cover:

1. Plugging in the power supply.

2. Placing your terminal on the base.

3. How to install.

1. Plugging in the power supply.

Take the power cable and plug it into the circular port on the base unit, as shown opposite.

2. Placing your terminal on the base.

It should just click into place. You'll know it's connected as the terminal will automatically power up.

3. How to install.

Once the terminal has powered up, you'll see the screen opposite.

Type in your merchant number and press **'Enter'** when done. You can find it in your welcome email.

Once completed, the terminal screen will display a **READY** prompt and show your merchant number.

To make sure the terminal is fully installed, we recommend doing a test transaction of 1p. You can find out how to do this in your **Ingenico IWL251 Quick-Start Guide**.
