Merchant User Guide.

Your iWL258
installation and user guide.

takepayments

we make it easy

We're excited to have you on board.

Our easy guide will help you get up and running in no time.

We'll cover:

1. Plugging in the power supply.

2. Connecting your terminal to the base.

3. Connecting your terminal to WiFi automatically.

4. Connecting your terminal to WiFi manually.

1.
Plugging in the power supply.

Take the power cable and plug it into the circular port on your base unit as shown.

Power Supply

2.
Connecting your terminal to the base.

Take the terminal and place it onto the base unit. It should click into place.

You'll know it's connected as the terminal will start to automatically power up.

Once it's plugged in, you'll be able to connect the base to WiFi automatically or manually.

- To connect the WiFi automatically, go to page 4.
- To connect the WiFi manually, go to page 6.

3.
Connecting your terminal to WiFi automatically.

Once the terminal has powered up, it'll show the first screen shown below.
Follow the steps to install your terminal.

1
```
Terminal Installation
Select WiFi Network

and press ENTER
```
This screen will show first.
Press '**Enter**' to continue.

2
```
Profiles
1 - New Profile
2 - Active Profile
3 - Modify Profile
```
Select '**1 – New Profile**' and press '**Enter**'.

3
```
Connection Method
1 - Automatic Scan
2 - Manual Connection
```
Select '**Automatic Scan**' and press '**Enter**'.

4
```
EE-BrightBox..
TALKTALK-12PZ34
SKY12PZ34
```
The terminal will scan and show nearby networks. Select your network and press '**Enter**'.

5
```
Security
1 - Personal Security
2 - Enterprise Security

and then press ENTER
```
It'll ask for your networks security type. Select '**Personal Security**' and press '**Enter**'.

6
```
WiFi Password
Node-adapt-nor
```
Type in your WiFi password and press '**Enter**'.

iWL258

Connecting your terminal
to WiFi automatically continued...

7 WiFi Password
OK

This screen will then show. Press
'Cancel' three times to reboot the
terminal.

8 Terminal Installation
Key In Merchant No.
(6 digit number)

and then press ENTER

Type in your merchant number and
press **'Enter'**. You can find it in your
welcome email.

Once completed, the terminal screen will display a **READY** prompt
and show your merchant number.

To make sure the terminal is fully installed, we recommend doing
a test transaction of 1p. You can find out how to do this in your
Ingenico iWL258 Quick-Start Guide.

If the WiFi network uses enterprise security, please check the
Ingenico iWL258 Quick-Start Guide to see how to do this.

4.

Connecting your terminal to WiFi manually.

Once the terminal has powered up, it'll show the first screen shown below.
Follow the steps to install your terminal.

1
```
Terminal Installation
Select WiFi Network

and press ENTER
```
This screen will show first. Press '**Enter**' to continue.

2
```
Profiles
1 – New Profile
2 – Active Profile
3 – Modify Profile
```
Select '**1 – New Profile**' and press '**Enter**'.

3
```
Connection Method
1 – Automatic Scan
2 – Manual Connection
```
Select '**Manual Connection**' and press '**Enter**'.

4
```
Hidden Access Point
1 – No
2 – Yes

and then press ENTER
```
You'll be asked if the WiFi is hidden on devices. Select the option that applies, and press '**Enter**'.

5
```
ESSID Entry
BRIGHTBOX-PZ1234

and then press ENTER
```
You'll be asked to provide your WiFi network name. Type in the network name and press '**Enter**'.

6
```
Security
1 – Personal Security
2 – Enterprise Security

and then press ENTER
```
It'll ask for your network's security type. Select '**Personal Security**' and press '**Enter**'.

Connecting your terminal to WiFi manually continued...

7 WiFi Password?
Node-adapt-nor

Type in your WiFi password and press '**Enter**'.

8 New Profile
OK

This screen will then show. Press '**Cancel**' three times to reboot the terminal.

9 Terminal Installation
Key In Merchant No.
(6 digit number)

and then press ENTER

Type in your merchant number and press '**Enter**'. You can find it in your welcome email.

Once completed, the terminal screen will display a **READY** prompt and show your merchant number.

To make sure the terminal is fully installed, we recommend doing a test transaction of 1p. You can find out how to do this in your **Ingenico iWL258 Quick-Start Guide.**

After rebooting, the terminal may go back to the WiFi connection screen. If this happens, press cancel, and the installation screen should appear. Please check for the WiFi signal bars.

If the WiFi network uses enterprise security, please check the **Ingenico iWL258 Quick-Start Guide** to see how to do this.

We're here to help make things easy.
